REST APIs, AI tools (Claude,
Google AI Studio), Agile
teamwork

PROFILE

Developer from Norway with an IT bachelor from Kristiania University College. Experience across frontend, mobile, and some backend development, building intuitive solutions from idea to finished product. Motivated to create technology with real everyday impact, and eager to grow as a developer in a professional environment.

WORK EXPERIENCE

Freelance - Web Development & Design

2024-Now

Completed numerous freelance projects for friends, family, and businesses, including development and design work – several of these can be found on my portfolio. gomilo2000.github.io

Clerk, KIWI, Hovsveien (Askim)

Responsible for register operations and restocking, while providing excellent customer service.

Clerk, REMA 1000, Sofienberg (Oslo)

2022-2023

Responsible for closing the store, register operations, and restocking, while providing excellent customer service.

Clerk, REMA 1000, Askim

2019-2021

Responsible for closing the store, register operations, and restocking, while providing excellent customer service.

PROJECTS

Bachelor Project - Angerman AS (React Native, Firebase)

A cross platform mobile app that digitalizes the safety training logbooks students use when certifying for heavy machinery. Built in an agile Scrum team where I was Scrum Master, it connects students, mentors, and instructors through a real time database with automatic hour tracking and document uploads.

TIF-raidthools Web App (React, TypeScript, Supabase)

An internal tool for running a World of Warcraft raiding guild that replaces the usual spreadsheets and Discord messages. It handles roster assignments, tracks attendance, visualizes group composition and buff coverage, and uses Discord OAuth to tie every action to a real member.

PERSONAL CHARACTERISTICS

Willing to learn and curious. Structured and responsible. Thrives both independently and in a team. Strong interest in technology and development.

OTHER RELEVANT EXPERIENCE

Officer & Active Member - World of Warcraft

Active member for over two years in the world's best 2-day raiding guild, and part of the leadership for the past year. Here I work closely with a distributed team of 20+ people on planning, recruitment, and performance tracking, contributing to structured processes that sustain long-term team success. The role demands clear communication and the ability to make time-sensitive decisions under pressure to execute complex objectives with precise coordination.
